

Odd Numbers

Objective

Identify and recall odd numbers

Equipment

- Orienteering Control Markers
- Enrich School Orienteering Map
- Activity Sheets
- Clipboard (suggested)

Preparation

- Select and print Activity Sheets

Instructions

- Teacher to assign groups of 2 or 3 to their starting points.
- Pupils use the Enrich School Orienteering Map to locate their starting point and each of the control points indicated on the Activity Sheets.
- At each control point, pupils fill in the four numbers from the control marker on their Activity Sheet
- Pupils use the numbers on the control markers to identify odd numbers. They can identify individual numbers from the control marker numbers as odd numbers. They can also combine numbers from the marker in whatever order they want, to create additional odd numbers.
- Remind pupils of the teacher's location for the task.
- Pupils to complete their first 5 questions and report back to the teacher.

Other information

- The teacher could differentiate this activity by instructing some pupils to identify any odd numbers from the 4 numbers on the marker and instructing higher ability pupils to combine numbers together to create 2,3- or 4-digit odd numbers.
- This activity could also be extended for pupils to find the biggest 2-, 3- or 4-digit odd number.
