

Gutted!

Objective

A competitive and cooperative physical activity which requires teams to use tactics and work together.

Equipment

- Water
- Pipes/gutters
- Sponges
- Funnels
- Buckets

Preparation

- Split the children into teams of 5.
- Place two buckets for each team roughly 5 meters apart.
- Fill one bucket with water.
- Give each team 2 pipes/gutters, a sponge, and a funnel.

Instructions

- The aim of the game is for each team to use the materials given to transfer the water from one bucket to another.
- Each team must work cooperatively and communicate effectively to transfer the water as many items have holes in which will decrease productivity.
- Teams cannot move either of the buckets.
- Teams cannot walk with the pipes/gutters.
- Suggest methods to use the pipes/gutters in a line to create a water flow.

Other information

- Increase or decrease the amount of equipment available to use.
