

# Locational Cards Chain Tag

## Objective

Name and locate cities of the United Kingdom

## Equipment

- Four sashes or bibs (each one is a different colour).
- 'UK Town/City Cards'. There should be enough cards for each child in the class to have a card.

## Preparation

- Choose four children to be chasers. Each chaser is given a different coloured sash or bib to represent one of the UK nations.
- The rest of the children are each given a UK 'Town/City Card'. (NB Children do not all have to have a different town/city card.)
- Identify a playing area, using cones to map out if necessary.

## Instructions

- Children can move around the playing area.
- The teacher gives a signal, and each of the 'chasers' attempts to capture one of the other players by tagging them.
- If a player is tagged, they show their 'City Card' to the chaser.
- If the city is in their country, the player joins with the chaser, holding hands and they attempt to capture another player.
- If the tagged player is not in their country, they cannot capture them, and that player is set free.
- When the teacher signals for the end of the game, they check each 'chain' with the class to see if the captured cities are from the correct UK nation.

## Other information

- This game could also be played with continents (chasers) and countries.
