

Oral Segmenting and Blending 1

Objective

Blend individual phonemes to make CVC words

Equipment

- Sets of objects and/or pictures with CVC names e.g. pig, cat, pen, bin etc.
- A set of hoops (one for each 'team')

Preparation

- Divide children into groups / teams
- Place a hoop at a short distance from the children. Each team has a hoop in front of them.
- Put a set of the objects/pictures in each hoop.

Instructions

- The adult says 'Can you find the....', saying the object/picture's name in separate phonemes e.g. 'P-I-G', 'H-A-T' etc. ('robot-talk').
- The first child in each team has to run to the hoop and find the object.
- They then run back with their object and hold it up.
- The adult then leads the children in saying the whole name of the object, then the name as individual phonemes, then the whole name again, to check if the child has brought the correct object/picture back.
- The adult then says the name of a different object/picture from the set as individual phonemes and the game continues.

Other information

- This game can be played with a larger group of children, divided into teams, or with a small group who play the game as one team.
