

Maze Runner

Bringing coding and geography to life in a fun and active way!

Developing the skills of giving accurate commands in a sequence or an algorithm.

Create a maze using household objects like cushions, chairs, toys, clothes etc. Blindfold a member of the family and give accurate sequenced commands in a clear and concise way. It is your job to direct your partner around your maze, ensuring that they do not touch any of the objects laid out.

Make it simple or as challenging as required by adding tasks crawling or climbing.

To enhance geography vocabulary why not use Cardinal (North, South, East & West) and Inter Cardinal (North West, North East, South West & South East) compass points for commands this can be done inside or outside in any space.

What will I need?

Variety of objects from around the house

Something to use as a blindfold

How do I gain credits for this Children's University activity?

Simply take part in the activity and evidence your wonderful work. Make a note of the special 'Activity Stamp Code' at the bottom of this page and take it into school. If you have a Passport to Learning call the Activity '*Enrich Education Online*' and write down the activity code in the '*Stamp of Approval*' section.
