

# Multiplying Fractions

## Objective

To multiply fractions

## Equipment

- Orienteering Control Markers
- Enrich School Orienteering Map
- Activity Sheet
- Clipboard (suggested)

## Preparation

- Select and print Activity Sheets.

## Instructions

- Teacher to assign groups of 2 or 3 to their starting points.
- Pupils use the Enrich School Orienteering Map to locate their starting point and each of the control points indicated on the Activity Sheets.
- At each control point, pupils fill in the numbers from the control marker to create two fractions, as instructed on their Activity Sheet.
- Pupils then multiply the two fractions together and record their answer on their Activity Sheet.

## Other information

- Remind pupils of the teacher's location for the task.
- \*Pupils to complete their first 5 questions and report back to the teacher.
- \*After a quick check the pupils can carry on with the activity.
- An alternative way that pupils could complete this activity, would be to record the numbers for each Activity Sheet and then complete the calculations when they return to the classroom.
- Times table sheets or cards could be provided to give more support to pupils.
