

Write Numbers In Words

Objective

Write numbers to 20 in words

Equipment

- Enrich Phonics and Number Markers
- Whiteboards, whiteboard pens
- Set of Phonics and Number Marker images

Preparation

- Children could do this activity in pairs
- The activity should take place where the school's Phonics and Number Markers are located.
- Before the activity, make sure that children know what each of the pictures on the markers are.
- The set of Phonics and Number Marker images can be downloaded from the 'Resources and Training' section from the school's account on the Enrich Orienteering and Outdoor Learning Hub.

Instructions

- The adult says the name of one of the pictures from the Phonics and Number Markers to each pair of children.
- They have to run and find the marker with that picture on it and look at both of the numbers from the marker. They then have to write each number in words on their whiteboard. (Each child in the pair could write one of the numbers.)
- They then run back to the adult, say what their marker picture was and show them the numbers that they have written on their whiteboard. (The adult can check from their Phonics and Number Marker images.)

Other information

Children who need additional support could be given a list of numbers to 20 written in words. They have to select the correct number from the list and write it on their whiteboard.
