

# Orienteering Challenge

## Number Sequences

### Objective

To practise identifying number sequences.

### Equipment

- Orienteering Control Markers
- Enrich School Orienteering Map
- Activity Sheet
- Answer Sheet

### Preparation

- Children could do this activity in pairs or small groups.
- Print an Activity Sheet and Enrich School Orienteering Map for each pair/group.
- Explain to children how to complete the Activity Sheet.

### Instructions

- The Activity Sheet has a series of sequences of 6 numbers, each of which has a missing number in the sequence.
- Each number sequence is linked to a specific control point.
- Children select from one of three numbers for each missing number.
- They can then check to see if they were correct by locating the control point linked to the sequence, using their Enrich School Orienteering Map.
- The 3rd letter on the control marker is next to the correct missing number for each sequence.

### Other information

- Children can check each answer as they complete them.
- Alternatively, they can select all their answers and then check them all.
